4. An information handling system for instantly alerting a remotely located vehicle owner of a situation requiring owner intervention comprising:
 - means for detecting receipt of an external message from a source unrelated to said owner to an IP address of an onboard vehicle client;
 - means, active in response to said means for detecting, for causing said onboard vehicle client to locate an IP address supplied by said owner; and
 - means for forwarding said external message to said owner IP address.
9. A computer program product for instantly alerting a remotely located vehicle owner of a situation requiring owner intervention comprising:
 - means for detecting receipt of an external message from a source unrelated to said owner to an IP address of an onboard vehicle client;
 - means, active in response to said means for detecting, for causing said onboard vehicle client to locate an address supplied by said owner; and
 - means for forwarding said external message to said owner address.
12. An information handling system including a plurality of Internet enabled, unrelated clients and a vehicle alert server, said server comprising:
 - means for detecting transmission of a message from a first client addressed to a second client;
 - means for determining from said second client an address for said third client; and
 - means for sending said message to said third client.
22. A method implemented in an information handling system including a plurality of Internet enabled, unrelated clients and a vehicle alert server, comprising:
 - detecting transmission of a message from a first client addressed to a second client;
 - determining from said second client an address for a third client; and
 - sending said message to said third client.
